

ON THE ROAD WITH HONDA

 **Enjoy your ride, make the most of it and always put safety first on the road.**

While it's difficult to prevent all the risks associated with riding a two-wheeler, investing in high-quality motorbike equipment is a wise move. This equipment offers enhanced protection in case of an accident and also provides effective defence against changing weather conditions. Making this choice will allow you to ride with confidence, knowing that you are well prepared to enjoy your riding experience to its fullest.

HELMETS

Wearing a helmet when riding a motorbike is essential for your safety, as it considerably reduces the risk of serious injury in case of an accident. By protecting your head from shocks and impacts, wearing a helmet allows you to enjoy your ride with complete peace of mind.

JACKETS

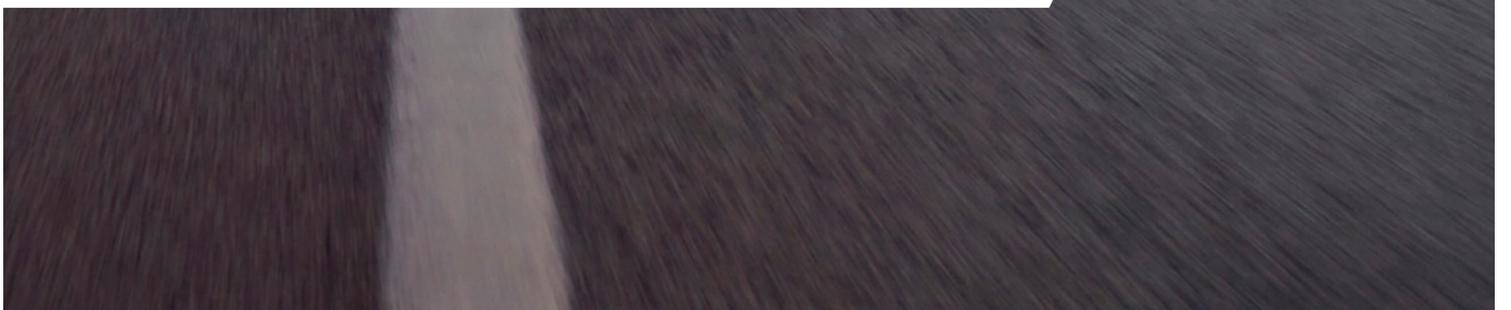

▀ Jackets provide excellent protection from the weather and act as the first line of defense in a fall. Correct fit and armor placement are extremely important. Jackets are usually made from leather, textile, mesh, or combinations of the three.

PANTS

 In a fall your knees, hips or legs are often the first things to contact the ground. For safety from the waist down you need both abrasion and impact protection in your pants.

GLOVES

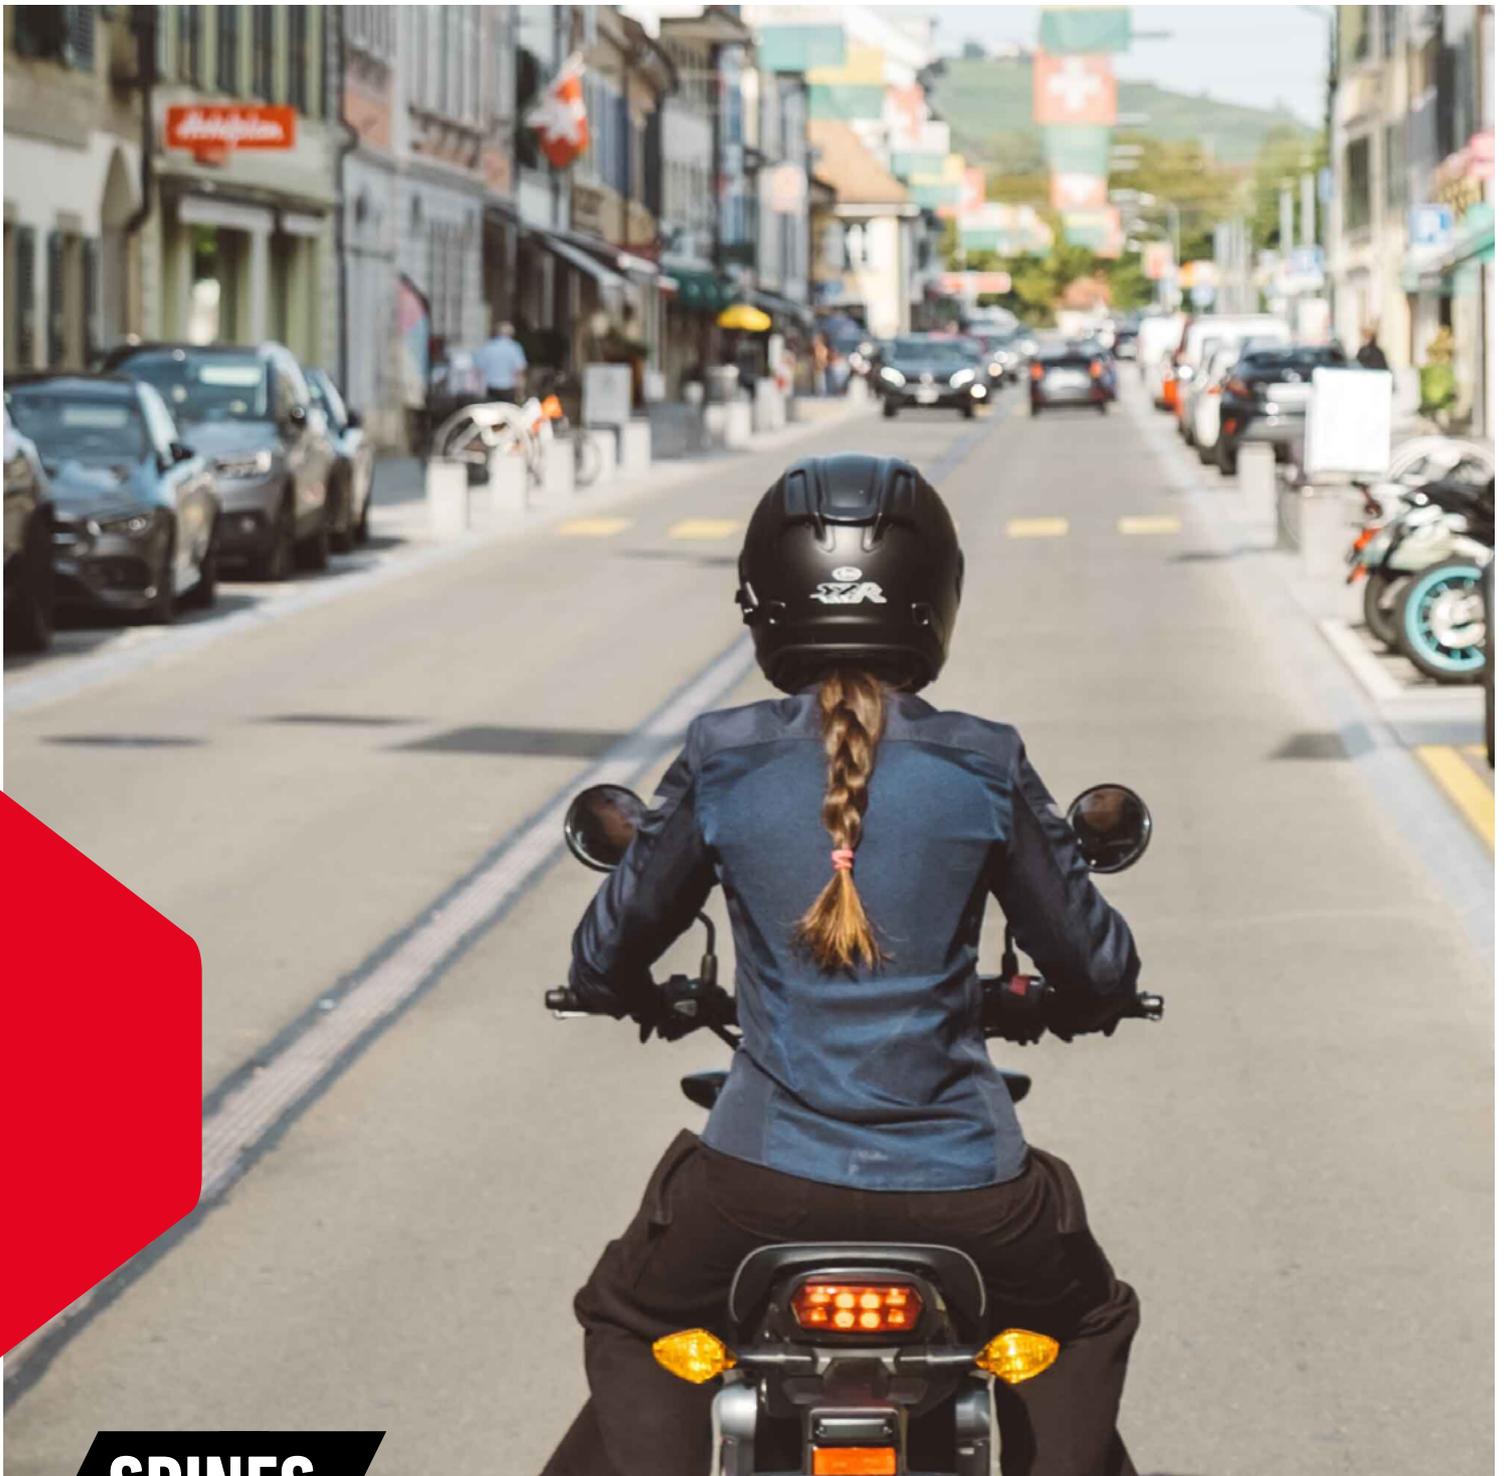

— A good pair of riding gloves not only protects your hands in the event of a fall, but also helps keep them from getting sore or tired. Leather construction with a plastic knuckle is recommended.

BOOTS

Quality footwear with good ankle protection is a must. Some boots can be quite dangerous because of the sole. Make sure yours do not have deep grooves that can hang up on the pegs easily.

SPINES

Most jackets and suits come with a supplemental spine protector or a back pocket to add extra ones. Spine protectors improve the level of protection as well as cover a larger portion of the back.
